Report-IT is the world's most popular smartphone codec app and has revolutionized newsgathering and live remote broadcasts to ensure you can go live first! Report-IT turns your iPhone or Android smartphone into a pocket-sized portable 15kHz live IP audio codec and ultra-slim high fidelity 20kHz audio recorder.

At the touch of a button broadcast live IP audio over cellular networks or Wi-Fi from any remote location to an IP codec in the studio. Perfect for remote broadcasts, live reports or two-way interviews, simply connect earphones to your phone and hear crystal clear studio communications and program audio in real-time while broadcasting.

Whether you are a freelance journalist, podcaster, community radio station, or a large radio network, we have a solution for you.

What can Report-IT do?

Forget cumbersome, complicated and expensive field recorders – with the multi award-winning Report-IT you can:

- Broadcast low-latency 15kHz live two-way interviews with the studio at the touch of a single button.
- Use either the high quality mic on your smartphone, or a professional dynamic mic, to prerecord up to 20kHz quality high fidelity audio, then file reports via FTP automatically.
- Prerecord interviews, trim them offline, then build a playlist and insert them as “wraparounds” into live crosses with the studio, or upload them to a podcast sites.

What version of Report-IT is best for me?

- **Report-IT Live for iOS:** allows freelance journalists to connect and contribute to networks equipped with Tieline hardware codecs.
- **Report-IT SIP for iOS:** designed for journalists wishing to connect to both Tieline and non-Tieline hardware codecs.
- **Report-IT Enterprise for Android and iOS:** a scalable solution for small, medium and large networks, enabling central management of their everyday reporters and guest contributors like celebrities and political dignitaries, using cloud-based technologies.

*Requires a Report-IT Enterprise SIP-enabled domain

Report-IT Enterprise enables broadcasters to deploy a smartphone codec in the field at a moment's notice and connect to Tieline or N/ACIP compliant codecs* in seconds.

What makes Report-IT different from other smartphone Apps?

Report-IT has been developed with input from world-class end users, network engineers and producers, resulting in an application that is not only easy to use, but is broadcast workflow-oriented.

Report-IT covers everything, from controlling input audio levels, connecting to a codec in the studio with a single touch, recording or playing back an interview, FTP transfer of audio into news ingest systems and network redundancy.

Greater Reliability with SmartStream PLUS

The integration of SmartStream PLUS into Report-IT delivers true network diversity for smartphone reporting. It allows users to stream using the phone's cellular LTE connection and simultaneously stream over commonly available Wi-Fi access points, or over an affordable MiFi (mobile Wi-Fi) device. If one connection is lost, the other will continue to stream reliable IP audio to the studio to ensure continuity of remote audio.

Report-IT Enterprise delivers Simplicity, Scalability & Security

Report-IT Enterprise is a secure cloud-based solution that provides networks with scalability, whereby they can create users and assign codecs and news ingest share settings at a moment's notice. This is performed with secure authentication throughout our globally redundant TieServer network.

Simplicity is taken to a new level with VIP-Connect. Users tap secure system-generated URLs to launch the app, and are then authenticated and automatically logged in within seconds.

How to trial Report-IT or Report-IT Enterprise

To trial Report-IT Enterprise on iOS or Android:

- Go to www.tieline.com/register to register
- Download the TieServer Console app and use the administrator login to create unique password and connection settings for each user
- Users download the Report-IT Enterprise app for FREE, enter secure username and password credentials configured by an administrator at the studio, then tap 'connect' and stream live high fidelity audio to the studio in seconds!

Report-IT App Options	
<p>Report-IT Enterprise (Apple & Android)</p> 	<ul style="list-style-type: none"> ➤ Cloud-based solution with an emphasis on simplicity ➤ Reporters and contributors install the free app from the App Store or Google Play; enter a username and password and go live in seconds! (requires annual TieServer subscription) ➤ Scalable to suit the specific needs of small, medium or large organisations ➤ Manage all users in the cloud from anywhere using the TieServer ➤ Optional SIP for Report-IT Enterprise Tieserver subscription upgrade to connect to non-Tieline N/ACIP 3326 compliant codecs ➤ Free Tieserver Console app (Apple or Android versions) ➤ Optional PC/Mac TieServer Console web-browser GUI for an additional low annual subscription ➤ Connect using a VIP-Connect URL: securely log in and launch the app with a single touch, without entering username and password credentials (requires PC/Mac Tieserver Console) ➤ Powered by Tieline's globally redundant TieServer network
<p>Report-IT Live (Apple)</p> 	<ul style="list-style-type: none"> ➤ All settings managed within the app on the phone itself ➤ For freelancers and independent journalists ➤ Basic app provides 2 hours of 'live-time' ➤ In-app upgrade to Pro version for unlimited 'live-time' and other features ➤ Purchase Report-IT Live from the App Store
<p>Report-IT Lite (Apple)</p> 	<ul style="list-style-type: none"> ➤ Free trial version with limited features. ➤ All settings managed within the app on the phone itself ➤ One hour of 'live time' provided free ➤ Download free from the App Store
<p>Report-IT SIP (Apple)</p> 	<ul style="list-style-type: none"> ➤ For freelancers and independent journalists who need to connect to Tieline and/or non-Tieline N/ACIP 3326 compliant codecs ➤ All settings managed within the app on the phone itself ➤ Basic app provides 2 hours of 'live-time' ➤ In-app upgrade to Pro version for unlimited 'live-time' and other features ➤ Purchase Report-IT Live from the App Store

To trial Report-IT on iOS download Report-IT Lite

- Download the App on the iTunes App Store.
- Follow the in-App registration to receive a 1 hour free trial.
