# 1   Enabling the Cloud Codec Controller

To allow Bridge-IT and Bridge-IT XTRA to be configured and managed by Tieline's Cloud Codec Controller over the public internet it needs to be enabled for CCC management:

1. Press the **SETTINGS** 🔘 button.
2. Use the navigation buttons to select **Web-GUI** and press the ⊙ button.

```
-38 |        | 0
Settings
┌──────────────┬──────────────┬─┐
│   Licenses   │     Time     │↑│
├──────────────┼──────────────┤ │
│ Reset/Backup │    WebGUI    │↓│
└──────────────┴──────────────┴─┘
```

3. Navigate down to **CC Controller** and press the ⊙ button to toggle between **Enabled** and **Disabled**.

```
-38 |        | 0
WebGUI Settings
┌───────┬───────────────┬─┐
│ SSL   │ Not Installed │↑│
├───────┼───────────────┤ │
│ CSRF  │ Disabled      │ │
├───────┼───────────────┤ │
│ CC Ctrl│ Enabled      │ │
└───────┴───────────────┴─┘
```

ℹ️ **Important Notes:**
- Ensure **CSRF** is disabled in the codec or it will not be able to connect to the CCC. This setting is **[OFF]** by default and is also available in the codec menu via **Settings > WebGUI**, and in the **Options** panel in Toolbox.
- Locally Defined Codecs over a private network do not need to be enabled for CCC operation. Only codecs that require internet access need to be enabled.
- The CCC needs to continually send and receive data between codecs to update information displayed. If the CCC is left open on a computer and is not used for more than 4 hours, the Codec Viewer is placed in 'sleep' mode to save on data use.
